**Position :** Assistant Professor : Onco-Anaesthesiologist

**Location :** Patel Nagar, Dehradun

AP Onco-Anesthesiologist will help our team in providing anesthesia and critical care to patients undergoing cancer treatment, including surgery, chemotherapy, and radiation therapy. He/she will play a crucial role in optimizing patients' health before, during and after these procedures, managing pain and addressing any complications that may arise.

**Key Responsibilities:**

- **Pre-operative Optimization:**

Assessing patients' overall health, identifying and managing pre-existing conditions, and optimizing their fitness for surgery or other cancer treatments.

- **Intra-operative Care:**

Administering anesthesia, closely monitoring vital signs, and managing any immediate complications that may arise during procedures.

- **Post-operative Care:**

Managing pain, nausea, and other side effects, ensuring patients are comfortable and stable as they recover.

- **Critical Care Management:**

Providing intensive care for critically ill patients, including those with complications from cancer, chemotherapy, or infections.

- **Pain Management:**

Managing both acute and chronic pain associated with cancer and its treatment, using various techniques such as regional blocks, epidurals, and patient-controlled analgesia.

- **Multidisciplinary Collaboration:**

Working closely with surgical oncologists, medical oncologists, radiation oncologists, and other specialists as part of a comprehensive cancer care team.

**Shri Guru Ram Rai Institute of Medical & Health Sciences**  
**Shri Mahant Indiresht Hospital**  
Patel Nagar, Dehradun - 248001

- **Research and Education:**

Participating in research related to onco-anesthesia and pain management, and contributing to the education of other healthcare professionals.

Subspecialties within Onco-Anesthesia:

- **Surgical Oncology:**

Anesthesia for various cancer surgeries (e.g., head and neck, breast, thoracic, gastrointestinal, colorectal, orthopedic, pediatric).

- **Robotic Surgery:**

Anesthesia for robot-assisted cancer surgeries (e.g., urology, gynecology, colorectal).

- **Pain and Palliative Care:**

Managing acute and chronic pain, including palliative care for patients with advanced cancer.

- **Critical Care:**

Providing intensive care for oncology patients with complications.

**In essence, an onco-anesthesiologist plays a vital role in ensuring the safety and well-being of cancer patients throughout their treatment journey, offering specialized care and expertise in anesthesia, pain management, and critical care.**

**Required qualifications :-**

1. MBBS + MD/DNB in Anaesthesia
2. DM in Onco- Anaesthesia or Fellowship training in Onco-Anesthesia.
3. Fellowships may focus on specific areas like Onco- and Robotic Anesthesia.
